## Application Report

<b>Industry</b>	Manufacturing Machines / Mining
<b>Type of Application</b>	Storage of spares during re-manufacture on movable trolleys to follow machines through remanufacture process
<b>Project Details</b>	Transmissions are stripped and may be in pieces for up to 3 months and require anti-corrosion protection for that period.
<b>Previous Problems</b>	Previous system had an inert cover and used oils/coatings to protect items. Messy, costly and clean up require before use. Environmental issues also are becoming a concern.
<b>Revised Packaging Solution</b>	Trolley (Winnebago) encapsulated in Intercept Woven with clear inspection windows. Document holders attached to exterior to keep track of contents.
<b>Benefits and Improvement</b>	Elimination of corrosion issues in items waiting to be used in re-manufacture process. Reduced reliance on volatile protection products. Items cleaner and easier to use. No clean up required before use.
