# **Overseas Shipping Trial Conducted By**

**Trial Dates: June 19, 2012 to August 7, 2012**

**Crankshaft Shipment from Sichuan Tingchen Mech., China to Cameron, Houston, TX**

## **Intercept Technology Trial by Cameron**

### **Test Trial Summary**

1. A freshly machined and cleaned (no coatings) crankshaft was wrapped in 8 mil Intercept Shrink Film at the Tingchen Mechanical facility in the Sichuan province of China by Intercept's China representatives, Glo Pack on June 19, 2012.
2. The wrapped and crated crankshaft was then shipped ocean freight to Cameron's facility in Houston, TX.
3. The crankshaft was unpacked on August 10, 2012.
4. Cameron recorded and reported that there was no corrosion present on the crankshaft.

## Cameron Intercept® Trial

Pack Out in China

Date: June 19, 2012

A 12 ft long crankshaft lowered into a crate lined with 8 mil Intercept Shrink. Desiccant is placed into the bottom voids on top of the Intercept film.

## Cameron Intercept® Trial

Pack Out in China

Date: June 19, 2012

Intercept film is wrapped around the crankshaft and sealed with tape.  
Time to wrap the crankshaft was about 23 minutes.

## **Cameron Intercept® Trial**

Arrival and Unpack in Houston, TX

Date: August 10, 2012

Crate with the crankshaft was received in Houston in good condition.

## **Cameron Intercept® Trial**

Unpack in Houston, TX

Date: August 10, 2012

All parts of the crankshaft were inspected and found to be free of corrosion.

# **Intercept Technology Trial by Cameron**

## **Trial Summary**

**Intercept Technology anti-corrosion packaging performed outstanding for protecting the crankshaft during overseas shipment.**

**Pack out time was reduced to 23 minutes and no protective wax coatings that have been traditionally used are not needed with Intercept.**

**By simply wrapping up parts and machinery in Intercept, considerable time and money is saved by eliminating the need for corrosion products being applied to machined surfaces, saving Cameron's Supplier the expense of the material, labor to apply it, and the solvent and labor to remove it.**
