

100% Reliability

Efficient

Oil-free

Reusable

# Application Report

<b>Industry</b>	All purpose motor
<b>Type of Application</b>	International shipping and short term storage
<b>Project Details</b>	Training for use of 8 mil Intercept shrink film for international shipping. Motor was cleaned, wrapped in Intercept film, and shipped.
<b>Previous Problems</b>	The individual manufacturer was purchased by ABB and needed to change its focus from domestic to international distribution of motors. In order to guarantee pristine product upon delivery its shipping procedure was revised to meet ABB standards, use of Intercept Technology.
<b>Revised Packaging Solution</b>	By using Intercept to wrap the motors, the distributor was able to eliminate application and removal of oil coatings, while protecting the integrity of its products and eliminating the need for post shipping rework.
<b>Benefits and Improvement</b>	Intercept was able to provide consistent results to ensure that the motors were delivered in working condition, while eliminating the need for application and removal of oils. This procedure allowed a small crew of packers to wrap the product in a time efficient manner while avoiding potentially hazardous skin irritants.
